DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 78-79, drawn to a peptide comprising a sequence of R1 to R5, classified in class 530, subclass 330.
- Claims 80-83, drawn to a peptide comprising X1 to X13, classified in class
 530, subclass 326.

The inventions are distinct, each from the other because of the following reasons:

- 2. Groups I and II are unique products. They differ with respect to their physicochemical properties and are therefore patentably distinct. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species for GROUP I;

- 4. A) a peptide comprising a sequence of the formula R1-R5 wherein R1 is a specific entity such as a specific amino acid followed by Lysine as recited in claim 78,
- 5. B)) a peptide comprising a sequence of the formula R1-R5 wherein R2 is a specific entity such as Tyr as recited in claim 78,

- 6. C) a peptide comprising a sequence of the formula R1-R5 wherein R3 is a specific entity such as Ala/Ala/Ala, as recited in claim78,
- D) a peptide comprising a sequence of the formula R1-R5 wherein R4 is a 7. specific entity such as YTLK, as recited in claim 78,
- 8. E)) a peptide comprising a sequence of the formula R1-R5 wherein R5 is a specific entity such as Ala/Ala/Ala, as recited in claim 78,

Species for GROUP II;

- 9. a peptide comprising X1-X15, where each X is a specific entity such as one of the entities recited in claim 80
- 10. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Application/Control Number: 09/707,738

Art Unit: 1644

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy M. DeCloux whose telephone number is 703 306-5821. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on 703 308-3973. The fax phone numbers

Application/Control Number: 09/707,738

Art Unit: 1644

for the organization where this application or proceeding is assigned are 703 305-3014 for regular communications and 703 305-7401 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308-0196.

Amy DeCloux, PhD Patent Examiner, Group 1600
